Summary

Senior Full-Stack Developer with 2.5+ years of experience building scalable micro-frontend, AI-powered, and enterprise web applications using React.js, TypeScript, Node.js, and Microsoft Fabric. Experienced in distributed systems, REST APIs, ETL pipelines, performance optimization, and leading high-impact enterprise projects.

Work Experience

Senior Software Developer Nov 2023 – Present
Polestar Analytics

- Led development and team initiatives for FinOps micro-frontend systems to monitor and optimize ETL infrastructure costs using Redis, Cron Jobs, and WebSockets.
- Worked with LLM-based AI Agentic Models to optimize notebook code, reducing operational costs by **40%**.
- Built monitoring and log analysis workflows for ETL systems using Redis, WebSockets, and real-time infrastructure tracking dashboards..
- Built interactive lineage visualization systems that improved enterprise data traceability and debugging efficiency across Azure Data Factory and Databricks workflows.
- Developed 5+ enterprise ETL modules using Microsoft Fabric, improving enterprise data integration efficiency by **80%**.
- Engineered role-based product tracking interfaces reducing lifecycle management errors and manual efforts by over **60%**.
- Led frontend development for Bayer Crops' Sales Planning Tool handling 100+ regional initiatives using React.js, Redux, and TypeScript.
- Implemented PWA offline synchronization using IndexedDB and Redux, improving sync efficiency by **30%**.
- Created real-time analytics UI dashboards integrating data from 8+ interconnected Excel sheets, reducing manual reporting efforts by **50%**.
- Presented AI and analytics solutions at Microsoft AI Tour NYC (2025) and London AI Tour in collaboration with Jarvis.

Software Developer Jul 2021 – Jul 2022
Tech Analogy

- Delivered 4+ production-ready applications using React.js, Next.js, and Tailwind CSS.
- Collaborated with cross-functional teams and mentored 4 developers, improving platform UI/UX and increasing user engagement by **20%**.
- Debugged and resolved 24+ critical production issues before deployment, reducing post-release defects by **60%**.

Projects

Cricketer's App Live Demo
Built a TypeScript-based player directory application with advanced filtering, recommendations, and responsive UI components for improved user experience.

E-commerce Template GitHub
Architected a modular e-commerce frontend template using React.js, TypeScript, and reusable UI components for scalable web application development.

Education

2019 – 2023 Bachelor of Technology, **Delhi Technological University** (CGPA: 8.34)

Skills

Frontend	React.js, Next.js, TypeScript, JavaScript, Redux, Tailwind CSS, HTML5, CSS3, PWA, IndexedDB
Backend	Node.js, Express.js, REST APIs, WebSockets, Microservices, Cron Jobs
Languages	JavaScript, TypeScript, Python, C++, Java, SQL
Databases	MySQL, PostgreSQL, Redis
Cloud & Data	Azure, Docker, Microsoft Fabric, Azure Data Factory (ADF), Azure Databricks (ADB), ETL Pipelines
Tools & Others	Git, Docker, CI/CD, Agile, System Design, Distributed Systems, AI Tools, Leadership, Problem Solving

Notable Achievements

- Received multiple formal performance awards at Polestar Analytics for rapid technical growth and exceptional delivery.
- Awarded the **Project Delivery Excellence Award** for leading the Data Nexus initiative.
- Achieved consecutive Runner-up (Silver Medalist) positions in Code Gladiators competitions (2022, 2023).
- Secured **Global Rank 17** on CodeChef and **Rank 2** on the GFG Institute Leaderboard.
